Education

Northeastern University, Khoury College of Computer Sciences

Boston, MA

B.S. in Computer Science and Business, Concentration in Fintech; GPA: 3.5/4.0

Expected Dec 2027

Study Abroad: Northeastern University program in Dublin, Ireland, Sep 2024 – Dec 2024

Relevant Coursework: Business Statistics, Computer Systems, Data Structures and Algorithms, Discrete Structures, Financial Management, Fundamentals of Computer Science 1 & 2, Introduction to Databases, Introduction to Mathematical Reasoning, Object-Oriented Analysis and Design, Software Engineering

Activities & Societies: Alpha Kappa Sigma Fraternity

Technical Experience

UT Dallas, StaRLing Lab

Dallas, TX

Research Intern

Jun 2023 – Jul 2023

- Co-authored machine learning research analyzing 421 Premier League transfers using 20+ player statistics to predict market transfer values from historical player and transfer data.
- Implemented and evaluated regression, neural network, and ensemble approaches including Random Forest, Gradient Boosting, and XGBoost, comparing model performance through cross-validation and hyperparameter tuning.
- Built an end-to-end Python data preprocessing pipeline that web-scraped player data, removed outliers, encoded categorical variables, normalized numerical features with MinMaxScaler, and prepared model-ready datasets.
- Conducted k-fold cross-validation with grid-search hyperparameter tuning, analyzed predictive results across multiple models, and presented findings and tradeoffs to the research team.

Cisco

San Jose, CA

Engineering Shadow

Jul 2022

- Built a Smart Calendar web application during a 3-day hackathon, integrating the Google Calendar API with voice-controlled scheduling and chatbot functionality to simplify calendar interactions.
- Engineered a Python NLP parser to convert natural-language time expressions such as “next Tuesday at 3 pm” into structured scheduling inputs, achieving 90%+ parsing accuracy across 50+ test cases.
- Integrated the Python backend with a React frontend through REST APIs, implemented the end-to-end scheduling workflow, and presented the working technical demo to a panel of industry judges.

Projects

RiskWeeks | *Next.js, TypeScript, React, Tailwind CSS*

Fremont, CA

Personal Project

Jun 2026 – Present

- Built a full-stack syllabus-analysis web application with Next.js, TypeScript, and React that extracts assignments, exams, projects, readings, and other course deliverables from syllabus content.
- Developed deadline-parsing and workload-risk logic in TypeScript to normalize dates, group deliverables by week, and identify periods with unusually concentrated academic demands.
- Designed a responsive React and Tailwind CSS interface that transforms unstructured course information into a semester-level workload view, helping students identify high-risk weeks before deadlines accumulate.
- Structured the application around reusable frontend components and typed data models to keep course, deadline, and workload information consistent across the user experience.

ProClubsHQ | *Next.js, TypeScript, React, Tailwind CSS*

Fremont, CA

Co-Lead

May 2026 – Present

- Co-led development of a responsive EA Sports FC Pro Clubs analytics platform using Next.js, TypeScript, React, and Tailwind CSS with live club and player search, leaderboards, comparison tools, and performance analytics.
- Integrated live EA Pro Clubs data into dynamic club and player profile pages displaying records, squad statistics, recent form, match history, and role-aware performance summaries.
- Developed reusable filtering, sorting, and comparison workflows across multiple platforms, enabling users to evaluate clubs and players through consistent statistical views.
- Built responsive, data-driven UI components for player and club discovery while organizing API-derived data into clear analytics views for desktop and mobile users.

Skills & Interests

Languages: HTML/CSS, Java, JavaScript, Python, SQL, TypeScript

Frameworks/Tools: Git/GitHub, Next.js, Pandas, React, REST APIs, scikit-learn, Tailwind CSS, XGBoost

Interests: AI/ML, Basketball, Fintech, Football, Software Engineering, Sports Analytics
